

At FertilitySA, we strive to help our patients achieve their fastest path to a healthy baby, and our leading success rates help make that a reality.

The 'In This Together' program is our way of offering financial support for our patients who require multiple IVF treatment cycles as part of their journey.

Though we can't guarantee how many cycles may be needed to help our patients achieve a live birth, we can provide a level of comfort around the cost.

The offer

If 3 full cost stimulated cycles have been completed with us, no live birth has been achieved, and there are no clinically usable embryos in storage, then FertilitySA will provide 2 further stimulated IVF cycles at \$1,650.00 out-of-pocket per cycle.

The \$1,650.00 out-of-pocket cost includes:

- The cycle fee for a stimulated IVF cycle
- ICSI, if required
- Embryo freezing

Patient eligibility criteria

- No age restriction
- 3 full cost stimulated cycles completed without a live birth
- No clinically usable embryos in storage
- Less than 5 months have elapsed since the previous treatment cycle was completed, prior to utilising the In This Together cycle
- Patients requiring PGT services are eligible
- Patient must be Medicare eligible
- All clinically usable embryos created and frozen in the 1st discounted stimulated cycle must be transferred prior to receiving the 2nd discounted stimulated cycle.

If you'd like to hear more about this program, please call (08) 8100 2900 or reach out to us via our website to learn more.

*Terms and conditions apply. Eligibility criteria apply. The \$1,650 out-of-pocket cost applies to the cycle. Exclusions such as day surgery and anaesthetist apply. Please speak to a FertilitySA team member for additional details.

Treatment costs

With FertilitySA, you have access to some of the best fertility technology, expertise and care in Australia. We're with you every step of your journey.

Fertility costs can vary, as each person's circumstances and needs are slightly different. This means informed decision-making is crucial and our supportive accounts team will help you to understand all your options during your pre-treatment accounts appointment.

Use the table below to explore some of the possible out-of-pocket expenses for our fertility treatments. Private health coverage and payment options are also available to help you navigate the financial aspects of your fertility journey.

Estimated costs

Procedure	Estimated Out-of-Pocket after Medicare rebates for 1st and subsequent cycles in calendar year
IVF Cycle (1st cycle in calendar year)	\$3,938
IVF Cycle (2nd-3rd cycles in calendar year)	\$3,257
IVF Cycle (4th-5th cycles FertilitySA ITT Program) *	\$1,650
ICSI Cycle (1st cycle in calendar year)	\$4,543
ICSI Cycle (2nd-3rd cycles in calendar year)	\$3,863
ICSI Cycle (4th-5th cycles FertilitySA ITT Program) *	\$1,650
IUI Cycle	\$1,460
Frozen Embryo Cycle	\$2,168
Elective Egg Freezing Cycle (Including GST)	\$5,195

Fees current as of March 2024. Please note these prices are a guide only, and subject to change. The Estimated Out-of-pocket cost is based on your Safety Net spending for the calendar year. After your consult with one of our Fertility Specialists you will be given an individualised estimate of all fees and rebates. Patients who are not eligible for Medicare should call for further fee information.

* Reduced pricing for cycles 4 and 5 under the FertilitySA ITT Program remains effective beyond the end of the calendar year (compared to competitor programs which require completion of all cycles within a calendar year in order to achieve reduced pricing).
